

Designing the Adhesion Technology of Tomorrow

Marketing Communications Intern

Are you looking to apply your knowledge into real world experience? Do you want to truly make a difference and be part of a vibrant and energetic team?

RadiSurf ApS is a cutting edge, award-winning nanotech start-up in the adhesives market. We are developing and commercialising our high performance adhesion technology that allows polymers to be joined securely and ultra-tightly with non-compatible hard materials including metal, carbon and glass, even under extreme conditions. No commercially available adhesive has been able to achieve this yet.

Here's your chance to be part of an industry revolution! While we have a great product with immense commercial potential, we need your help to enhance our visibility through strong marketing communications. Participate in developing our business strategy and put your ideas into action. Our work is challenging, but rewarding and everyone plays a crucial role in the development of our business.

Get to:

- Be part of building our marketing strategy
- Create marketing material including monthly newsletters, press releases etc.
- Outreach to journalist etc.
- Manage our website and social media outlets
- Other relevant marketing and branding assignments

You should be:

- Currently studying Marketing, Communications, or relevant other Business course
- Excellent English skills

While this internship is unpaid, you can gain valuable industry experience from working with our vibrant team and with direct leadership from our CEO Mikkel Kongsfelt. We are flexible with work hours and are happy to accommodate your study schedule - this means part-time interns are welcome too.

If you're a motivated individual who wants a fun yet inspirational working environment, don't hesitate to apply as a Marketing Communications Intern. Send your resume and cover letter to mikkel@radisurf.com.
